

Free Home Inventory Checklist (20–40 minutes)

Before you start: charge your phone, turn on the lights, and open closets and cabinets.

1. Room by room

1. Stand in a doorway and take one wide photo of **each wall** (4 per room), or record a slow 30-second video turning in a circle.
2. Name each folder by room (e.g. "Kitchen") or say the room name at the start of the video.

2. Close-ups that matter most

- TVs, computers, game consoles, cameras: front **and** the label with brand, model and serial number
- Appliances: washer, dryer, fridge, stove, microwave, vacuum
- Furniture: sofas, beds, dining sets
- Jewelry, watches, art, collectibles, instruments, tools, bikes
- Inside closets and the garage: one wide shot each

3. Receipts (optional)

Photos of receipts or order confirmations for big purchases make values stronger.

4. Store it safely

Keep a copy off-site: a cloud folder or a USB drive at a relative's house. Update it once a year and after big purchases.

Privacy tips

Don't store photos of documents with account numbers or safe combinations in the same folder.
